Introduction

Gold Ofir is an innovative company that seeks to foster the growth of startups and promising business opportunities (PBOs) through its Financial Support Token, the FGOL (Foment GOL). Based in Georgia - GE, the company expands its services worldwide in partnership with Blockum DAO, a decentralized community that approves and assists in the selection process of startups and PBOs.

Value Proposition - Boosting Startups and Promising Business Opportunities

The digital era has transformed various sectors, creating opportunities for new businesses and innovative solutions. Gold Ofir, through its FGOL financial support token, aims to support startups and promising business opportunities (PBOs), generating value and sustainable growth in the global entrepreneurship ecosystem.

Gold Ofir's value proposition is to provide financial and strategic support to startups and PBOs with potential for success. Through its FGOL token, Gold Ofir seeks to boost the development of innovative companies while, at the same time, providing returns to participants of the Blockum DAO community. The partnership between Gold Ofir and Blockum DAO allows for a thorough and discerning analysis and selection of startup and PBO proposals, ensuring that only the best opportunities are supported.

Glossary of Terms

- Gold Ofir: Company that provides the FGOL Financial Support Token for investments in startups and promising business opportunities (PBOs).
- FGOL (Foment GOL): Financial Support Token used by Gold Ofir to invest in startups and PBOs.
- Blockum DAO: Decentralized Autonomous Organization (DAO) that collaborates with Gold Ofir in the analysis and selection of startups and PBOs for investment.
- Startups: Young and innovative companies seeking to develop and scale new solutions in the market.
- Promising Business Opportunities (PBOs): Projects or companies with potential for growth and success in the market.
- LP Tokens (Liquidity Provider Tokens): Tokens issued by a decentralized exchange, such as SushiSwap, that represent the user's participation in the liquidity pool.
- GSTAR Pool: Liquidity pool created on SushiSwap, composed of 50% GOL tokens and 50% WETH.
- HODL: A popular term in the cryptocurrency world, originating from a typo of "hold" in a Bitcoin discussion forum. HODL refers to the practice of keeping and not selling cryptocurrencies, even in times of price volatility, with the expectation that their value will increase in the long term. This strategy is based on the idea that the adoption and development of cryptocurrencies and blockchain technology will bring significant returns in the future.

Glossary of Terms

- WETH: "Wrapped" version of Ether (ETH), allowing it to be traded as an ERC20 token.
- Smart Contract: Autonomous and programmable contract that facilitates the execution of transactions and activities on a blockchain platform.
- ERC20: Technical standard used for creating tokens on the Ethereum blockchain and other EVM networks.

The Strategic Alliance: Gold Ofir and Blockum DAO

The collaboration between Gold Ofir and Blockum DAO combines Gold Ofir's financial and strategic expertise with the decentralized governance and collective wisdom of the Blockum DAO community. This partnership ensures that only the best startup and PBO proposals are selected and supported, resulting in higher chances of success and returns for investors.

Competitive Advantages: The Unique Business Model of Gold Ofir

Gold Ofir offers several competitive advantages for startups and investors:

- **Thorough and careful analysis and selection:** The partnership with Blockum DAO enables a detailed and rigorous selection process, identifying companies with high growth potential and success.
- **Recurring returns and profit distribution:** Investors and Blockum DAO community members benefit from a recurring distribution of 45% of the profits generated by supported startups and PBOs.
- **Transparent and participatory governance:** The involvement of the Blockum DAO community in the decision-making process and voting on proposals ensures an open and democratic governance environment.
- **Forced HODL:** By allocating LP tokens to the GSTAR pool, users secure their participation in profits and benefit from HODLing two rising assets.

Connecting Startups and Investors: The Role of the FGOL Token

The FGOL token is the central element connecting startups, investors, and the Blockum DAO community. By investing in FGOL, investors and startups have the opportunity to participate in a dynamic and promising ecosystem, driving growth and success for the supported companies.

Security and Reliability: The Blockum DAO Smart Contract

Gold Ofir and Blockum DAO prioritize security and reliability in all transactions and interactions within the ecosystem. The Blockum DAO smart contract uses the OpenZeppelin library, ensuring the implementation of the ERC20 standards and a secure and robust access control.

Distribution and Allocation of FGOL Tokens

Gold Ofir generated a total of 1 billion FGOL tokens, with the following distribution and allocation:

- 220 million FGOL tokens (22%) were sold to the co-founders of Gold Ofir. This initial allocation allowed the funding of the company's early operations and the development of the ecosystem.
- 500 million FGOL tokens (50%) are reserved for the support of startups and PBOs. These tokens will be used to invest in promising companies, ensuring the growth and success of the ecosystem.
- 280 million FGOL tokens (28%) will be used for the maintenance and development of Gold Ofir. This allocation will ensure the sustainability and continuity of the company's operations.

It's worth noting that 10% of the agreed-upon value between Gold Ofir and the startups/PBOs will be allocated to the maintenance of Blockum DAO. This ensures that Blockum DAO also remains sustainable and continues to collaborate with Gold Ofir in the analysis and selection of the best investment opportunities.

Possibility of Additional FGOL Token Issuance

If in the future there is a need for more resources to support startups and PBOs or for the maintenance of Gold Ofir and Blockum DAO, there is the possibility of issuing an additional amount of FGOL tokens. This additional issuance will be subject to the approval of the Blockum DAO community and the terms established by the smart contract.

In this way, the Gold Ofir and Blockum DAO ecosystem remains flexible and adaptable to future needs, ensuring the ability to continue supporting promising startups and PBOs, as well as ensuring the sustainability of the entire ecosystem in the long run.

The Opportunity to Invest in the Future

The Gold Ofir proposal represents a unique opportunity for investors, startups, and members of the Blockum DAO community to participate in an innovative and promising ecosystem. By investing in the FGOL token, all parties have the chance to collaborate in the development and growth of companies with high potential for success.

The strategic alliance between Gold Ofir and Blockum DAO ensures a thorough analysis and selection process, providing greater security and reliability in the investments made. The recurring distribution of profits and the transparent and participatory governance offer significant competitive advantages for the participants in this ecosystem.

With the use of the Blockum DAO smart contract, Gold Ofir ensures that transactions and interactions within the ecosystem are secure and reliable, providing a conducive environment for the growth and success of the supported startups and PBOs.

In summary, by investing in the FGOL token and becoming part of the Blockum DAO community, you will be not only supporting a future filled with innovation and success but also generating significant returns and contributing to the growth of promising companies worldwide. This is your chance to invest in the future and be part of the global entrepreneurship revolution. Don't miss this opportunity!

Diagram of the Governance and Operation of the Gold Ofir

Here is the revised explanation of the diagram:

- The user allocates WETH and FGOL in the GSTAR Pool and receives LP Tokens as collateral.
- The user allocates these LP Tokens in the Blockum DAO Smart Contract.
- Gold Ofir distributes FGOL to approved Startups and PBOs.
- The Startups and PBOs return the investment and possible gains in FGOL to Blockum DAO.
- Blockum DAO, in turn, distributes FGOL proportionally to the holders of LP Tokens.
